Proposed Organization of Wheeling's Patriotic Women

WILL PROBABLY SOON BE EFFECTED

And the Members Will Only Buy Goods of American Manufacture-A General Interest in the Project All Over the Country, and the Organization May be a National One,

As chronicled in the INTELLIGENCES some time ago, there has been a movement among certain patriotically inclined women of the South Side looking to the organization of an association. the principal object of which would be to discourage the purchase of goeds of foreign manufacture, and encourage the consumption of American manufactured articles wherever possible. The movement was allowed to slide along for the past two months until it was assured that the Wilson "revenue" bill would pass through both branches of the national legislature.

the national legislature.

It is now generally conceded that the bill with most of its injusitious provisions practically untouched, will be uncarthed from the senate and so the President, who, of course, will at once sign, making it a law. This being the state of affairs, the ludies who are responsible for the conception of the Loyal Legion of American Women scheme will probably soon meet and perfect their organization. The recent publication regarding the proposed or period their organization. The recent publication regarding the proposed or-ganization, in the Intelligences, aroused general and in many cases fa-vorable comment all over the country, and it would not be surprising if the Wheeling legion should be the nucleus of a great mational organization having the same patriotic and commendable principles. principles.
The wheeling iden—as it will now be

known-may yet be a great factor in the economic allairs of the day.

Neither father nor mother should say a word to poison the minds of these children against either.

"Children," added the court, "I want to say to you that you should love both your father and mother and never say anything to hurt the feelings of either. You will live with your mother, but you must not forget to remember you have a father and should love both."

That the children wanted to remain with the mother was evident and was shown by their looks of delight. The judge, in his opinion, merely goes over the testimony and enlarges on his reasons. He suggests that \$30 per month for each of the children is a moderate sum in addition to the \$50 the wife already receives.

The court said that the attorneys for Mrs. Barnsdall had made all offers for a fair and moderate settlement as to money matters, but the offers had been declined by Mr. Barnsdall. The two children came around the table, kissed their father and then left the room with their mother, happy and contented.

In his opinion Judge White says: "There is no evidence, or oven allegation against the moral character or reputation of the wife. The evidence shows that the mother is devoted to the shildren tay and children is and children is a will engaled to the shildren it wall engaled to the selection of the wife. "From the husband's character, habits of life and frequent absences from home, he is not a fit person to have the immediate custody of these cirls. It would be a perilous thing to place them under the control of a stranger."

BRAZILIAN SITUATION.

Measures Taken to Crush Out the Rebellion-The Yellow Fever.

Rio De Janeiro, March 2.-President Peixoto to-day issued two important decrees. The first of these announcements calls for an increase in the strength of the regular army and will therefore, impose additional burdens upon the people and increase the already heavy taxation to a great degree. This increase of the strength of the regular army is said to be the first step in a movement to crush out the re-bellion in this neighborhood and in the bellion in this neighborhood and in the south, and should this object be attained, it may be said that the additional burden which the people will be called upon to bear will after all be a biessing in disguise.

The second decree issued by the President provides that persons accused of treason shall be tried by military law, which would seem to indicate that additional repressive measures are processor.
